

OPHELIA

The mission of Loving Sister Earth is to pray and labour for Universal Harmony, that all may live in a relationship of mutual respect. A respect for the delicate balance within creation is vital for our survival at this time. To ignore this is to open the door to imbalance and lack of harmony. In Ireland Ophelia has just visited us and left behind a frightening message, spelt out in its trail of destruction. Ophelia is warning us of our new future; we must read the signs of the times and radically change the ways we live. But how to do this?

From Quantum Theory we know that all of creation is interconnected: everything we do affects something else. So when we pray for Universal Harmony we engage in a chain reaction which will have a beneficial effect in the cosmos. At Loving Sister Earth we have been working to bring this about with a focus on our Celtic Christian heritage. We invite you to commit yourself to praying with us for Universal Harmony, and to listen to what the Holy Spirit is nudging us to do.

Such prayer may seem very inadequate to bring about the required changes, but all the resources of divine energy support such prayer. Drawing on our ancient heritage, our generation can now give a lead to the world, by engaging in prayer and courageous action.

So don't sit idly by: your country needs you to join in the cosmic yearning for Universal Harmony and to act as the Spirit empowers you.
